A number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Potential risks and uncertainties include, but are not limited to, severe or prolonged downturn in the global or Chinese economy, general declines or disruptions in the travel industry, volatility in the trading price of Ctrip’s ADSs, Ctrip’s reliance on its relationships and contractual arrangements with travel suppliers and strategic alliances, failure to compete against new and existing competitors, failure to successfully manage current growth and potential future growth, risks associated with any strategic investments or acquisitions, seasonality in the travel industry in the relevant jurisdictions where Ctrip operates, failure to successfully develop Ctrip’s existing or future business lines, damage to or failure of Ctrip’s infrastructure and technology, loss of services of Ctrip’s key executives, adverse changes in economic and political policies of the PRC government, inflation in China, risks and uncertainties associated with PRC laws and regulations with respect to the ownership structure of Ctrip’s affiliated Chinese entities and the contractual arrangements among Ctrip, its affiliated Chinese entities and their shareholders, and other risks outlined in Ctrip’s filings with the U.S. Securities and Exchange Commission. About Non-GAAP Financial Measures

To supplement Ctrip's unaudited condensed consolidated financial statements presented in accordance with United States Generally Accepted Accounting Principles ("GAAP"), Ctrip uses Non-GAAP financial information related to product development expenses, sales and marketing expenses, general and administrative expenses, income from operations, operating margin, net income attributable to Ctrip's shareholders, and diluted earnings per ordinary share and per ADS, each of which (except for net commission earned) is adjusted from the most comparable GAAP result to exclude the share-based compensation charges recorded under ASC 718, "Compensation-Stock Compensation" and its share-based compensation charges are not tax deductible, and fair value changes of equity securities investments, net of tax, recorded under ASU 2016-1. Ctrip's management believes the Non-GAAP financial measures facilitate better understanding of operating results from quarter to quarter and provide management with a better capability to plan and forecast future periods.

Non-GAAP information is not prepared in accordance with GAAP and may be different from Non-GAAP methods of accounting and reporting used by other companies. The presentation of this additional information should not be considered a substitute for GAAP results. A limitation of using Non-GAAP financial measures is that Non-GAAP measures exclude share-based compensation charges and fair value changes of equity securities investments that have been and will continue to be significant recurring expenses in Ctrip's business for the foreseeable future.

Reconciliations of Ctrip's Non-GAAP financial data to the most comparable GAAP data included in the consolidated statement of operations are included at the end of this press release.

** The Company adopted the new financial instruments accounting standard from January 1, 2018 and approximately RMB6 billion of accumulated other comprehensive income for the available-for-sale equity securities that existed as of December 31, 2017 was reclassified into retained earnings upon the initial adoption. After the adoption of this new accounting standard, the Company measured its available-for-sale equity securities at fair value with gains or losses recorded through the income statements, which could vary significantly from quarter to quarter. The impact of applying this new standard for the third quarter of 2018 resulted in an increase of approximately RMB2.6 billion in pre tax loss, net of tax of RMB0.1 billion.

* The new revenue standard (ASC 606) was effective from January 1, 2018 and the revenue of 2018 was reported under new standard. We adopt the full retrospective approach under which, the revenue and other major line items of consolidated statements of comprehensive income and related items of balance sheet of the comparable periods were restated accordingly. The impact of applying this new standard for the third quarter of 2017 resulted in an increase of approximately RMB220 million in net revenue. Meanwhile, as of December 31, 2017, accounts receivable and retained earnings increased with approximately RMB190 million. Deferred tax liabilities as of December 31, 2017 and income tax expenses of the third quarter of 2017 were restated accordingly.
